### 24.06 **ORDERS TO ELIMINATE DANGEROUS OR HAZARDOUS CONDITIONS**.

(1) **WHEN TO BE ISSUED**. Whenever the Chief finds in any building or upon any premises any of the following dangerous or hazardous conditions or materials which present a clear and present danger due to likelihood of fire or explosion, such materials shall be removed or conditions remedied in a reasonable manner:

- (a) Dangerous or unlawful amounts of combustible or explosive materials.
- (b) Hazardous conditions arising from defective or improperly installed equipment for handling or using combustible or explosive materials.

(2) SERVICE OF ORDERS.

(a) The service of written orders for the correction of violations of this chapter shall be made upon the owner, occupant, or other person responsible for the conditions, either by delivering a copy of same to any person in charge of the premises or by mailing such orders to the owner or other responsible person. This subsection shall not preclude the Chief from issuing orders orally or in such other manner as deemed appropriate under the circumstances.

(b) If buildings or other premises are owned by one person and occupied by another, the orders issued in connection with the enforcing of this chapter shall apply to the occupant thereof as well as to the owner, except where the rules or orders require the making of additions to or changes in the premises themselves, such as would immediately become fixtures upon real estate or real estate and be the property of the owner of the premises. The timeframe to correct deficiencies will be identified on the inspection report or through correspondence from the Fire Marshal's office. Any fire code violation not corrected within the specified time allotment will be warned again, and seven days will be given to correct non-Life Safety Code violations. A third warning for the same uncorrected violation will result in a citation being issued by the Fire Chief or designee.

(3) THREE STRIKES RULE. Whenever the Chief shall find in any building or upon any premises during any three consecutive inspections or re-inspections a fire prevention, detection, or suppression system which is defective, inoperative, improperly maintained or improperly operated, the Chief may order the following remedies:

(a) If the system includes one or more exit light(s) which have not been illuminated during inspections, the Chief may order that any or all of the exit lights in such premises be equipped with self-illuminating lights or lights equipped with light emitting diodes (LEDs).

(b) If the system includes one or more self-closing fire door(s), any of which have been found to have been held open with non-approved hold open devices during inspections, the Chief may order that any or all of the fire doors in such premises be equipped with an automatic closing device.

(c) If the system includes one or more battery operated smoke detector(s) which have been inoperative during inspections, the Chief may order that the premises be equipped with smoke detectors hardwired into the electrical service of the premises.

(d) If the system includes emergency exit doors which, during hours of occupancy, have been found to be secured or locked with bolts, bars, chains, padlocks, or locking devices other than the primary door lock, the Chief may order the removal of such bolts, bars, chains, padlocks, or additional locking devices; and the Chief may further order that all emergency exit doors within the premises be equipped with panic door release hardware.

(e) This subsection shall not be construed as a limitation upon the powers of the Chief to issue orders for corrections of violations nor shall this subsection be construed as a limitation upon any of the powers of the Chief under any applicable provision of the City of Green Bay Code of Ordinances, Wisconsin Administrative Code, or the Wisconsin State Statutes.
